

Düsseldorf, Germany

Teaching Session 3 - Interactive
Monday, October 15, 14:30-16:00

Session Title
ESMIT - Modern Insight in Medical Education

Chairperson
Jan Pruim (Groningen)
Petra Kolenc-Peitzl (Ljubljana)

Programme

- 14:30 - 15:15 Richard M. Schwartzstein (Boston): Flipping the Classroom: Making the Most of Your Time With the Learner
- 15:15 - 16:00 Paul Brand (Groningen): Principles of Workplace Learning - The Art and Science of Becoming a Nuclear Medicine Clinical Educator

Educational Objectives

To create awareness of modern techniques of how to teach trainees, in order to strengthen the theoretical basis of knowledge and skill.

Summary

For several years the notion exists that traditional ways of teaching, which are teacher oriented, are not the best in terms of yield of the teaching. An active learner approach will increase yields. The moderators will show several techniques that can be made use of in daily practice when teaching the theoretical backgrounds of nuclear medicine.

Key Words

Teaching tools, training, flipped classroom, didactics
